PROFESSIONAL SUMMARY

Cloud Platform & DevOps Engineer with 12+ years architecting, automating, and operating mission-critical, cloud-native infrastructure at hyperscale. Deep, hands-on expertise spanning Public Cloud (AWS preferred; Azure) across IaaS, PaaS, and Serverless; container orchestration with Kubernetes (EKS/AKS/OpenShift), Docker, and ECS; and Infrastructure as Code with Terraform, CloudFormation, and Bicep. Designs reusable frameworks, APIs, CI/CD delivery pipelines, test automation, and infrastructure automation that accelerate enterprise cloud transformation. Proven leader of large-scale infrastructure migration and hybrid-cloud integration, with strong cloud security, networking, and data-engineering foundations. Expert scripter (PowerShell, Python, Bash) who has automated thousands of engineering hours, eliminated 25,000+ incidents, and sustained 100% SLA across 20+ production services. Comfortable in fast-paced, continuous-learning environments and recognized for leading and educating teams on cloud deployment patterns.

CAREER SNAPSHOT

12+ Years in Cloud / Infrastructure Engineering
30-35% Incidents Auto-Resolved (AI SRE Platform)
100% SLA Across 20+ Production Services
25,000+ Stale Incidents Eliminated
85%!98% Operational Efficiency Lift
15-32 Engineers Led Across Global Teams

KEY ACHIEVEMENTS

- Architected an AI-driven incident-automation platform achieving 30-35% automated resolution across a 24/7/365 platform serving millions of users.
- Drove operational efficiency from 85% to 98% and reduced issue-resolution time by 32% through automation and framework redesign.
- Eliminated 25,000+ stale/false-positive incidents and streamlined 500+ redundant alerts, cutting alert fatigue ~90%.
- Maintained 100% SLA across 20+ mission-critical production services; sustained 99.95%+ platform reliability at data-center scale.
- Led global teams of 15-32 engineers across the US and India; authored 175+ runbooks/playbooks in 5 months.

TECHNICAL COMPETENCIES

Public Cloud: AWS (preferred), Microsoft Azure, IaaS / PaaS / Serverless, Multi-Cloud Architecture

Containers & Orchestration: Kubernetes (EKS / AKS / OpenShift), Docker, Amazon ECS, Container Security, Registries (ECR / ACR)

Infrastructure as Code: Terraform, AWS CloudFormation, Bicep / ARM Templates, Reusable Module Design

CI/CD & DevOps: Jenkins, AWS CodeBuild, Spinnaker, Bitbucket / Git, JFrog Artifactory, ADO Pipelines, Ansible, Rundeck, Checkmarx

Cloud Migration: Lift-and-Shift & Re-platform, Hybrid-Cloud Integration, Zero-Downtime Cutovers, AWS DMS-class Migration

Data Engineering: AWS Glue, Amazon EMR, Lake Formation, S3 Data Lake, Aurora PostgreSQL, Large Data Sets

Security & Networking: IAM & Resource Policies, AWS KMS / KeyVault, VPC / Subnets / Load Balancers,

CloudFront / Cloudflare, OKTA / ADFS, Cloud Security

Observability: CloudWatch, Azure Monitor / AppInsights, Kusto (KQL), Power BI, Metrics & Streaming Telemetry

Scripting & Languages: PowerShell, Python, Bash, Java (working), Node.js / React (working), PHP (familiar)

Databases: PostgreSQL / Aurora, MS SQL, MySQL, DynamoDB, Oracle

Delivery Methodology: SAFe, Kanban, Agile / Scrum, DevOps, Jira, Confluence

TECHNICAL PROFICIENCY

Infrastructure as Code (Terraform, CloudFormation, Bicep) — **Expert**

Container Orchestration (Kubernetes, Docker, ECS/EKS) — **Advanced**

CI/CD & DevOps (Jenkins, Bitbucket, Spinnaker, Git, Artifactory) — **Expert**

Scripting & Automation (PowerShell, Python, Bash) — **Expert**

Public Cloud — AWS (IAM, VPC, S3, EC2, ECS, EKS, RDS, Lambda) — **Advanced**

Public Cloud — Azure (Monitor, AppInsights, KeyVault, AD) — **Expert**

Cloud & Infrastructure Security (IAM, KMS, OKTA/ADFS) — **Advanced**

Observability & Telemetry (CloudWatch, KQL, Power BI) — **Expert**

Cloud Migration & Hybrid Integration — **Advanced**

Networking (VPC, ELB, DNS, CloudFront/Cloudflare) — **Advanced**

PROFESSIONAL EXPERIENCE

Lead Cloud Reliability & Escalations Engineer — Xbox Cloud Services (SRE)

Microsoft Corporation (via TechMahindra) | Redmond, WA | May 2021 - Present

Central engineering authority for a 24/7/365 mission-critical cloud platform serving millions of users; owns infrastructure automation, CI/CD reliability, and cross-team cloud deployment patterns.

- Architected and operated end-to-end cloud-native solutions from low-level architecture documents, translating designs into production infrastructure and reusable frameworks.
- Built Infrastructure-as-Code delivery pipelines (Terraform + CI/CD) and managed production build/release pipelines (Git, ADO/CodeBuild-class) across the full design-build-test-deploy lifecycle.
- Designed container deployment pipelines using Docker and Kubernetes (AKS/EKS-class orchestration), improving rollout safety, scalability, and rollback.
- Engineered an AI-driven incident-automation platform (Azure SRE Agent) reaching 30-35% automated resolution; integrated Logic Apps, AppInsights, metrics, and streaming telemetry.
- Automated infrastructure and operations with PowerShell and Python, eliminating 25,000+ stale incidents and 500+ alerts and lifting efficiency from 85% to 98%.
- Partnered with Security, Enterprise Architects, and IT Infrastructure to integrate cloud and on-prem services for secure operations; acted as SME resolving cross-system integration failures.
- Built CloudWatch/Azure Monitor + Kusto (KQL) + Power BI observability exposing SLA, metrics, and livesite trends to executive leadership.
- Led and educated cross-functional teams on cloud deployment patterns; authored 175+ runbooks/playbooks in 5 months; reduced resolution time by 32%.

Azure Cloud Platform Technical Lead — Customer Support Services

Microsoft Corporation (via Mindtree) | Redmond, WA | Nov 2016 - May 2021

Led a 15-engineer team delivering enterprise cloud platform, migration, and capacity solutions across IaaS/PaaS workloads.

- Provided leadership on infrastructure migration methodologies; executed large-scale enterprise data and subscription migrations with zero-downtime cutovers (DMS/migration-pattern class).
- Integrated cloud and on-premises services with Active Directory and identity (ADFS/OKTA-class) for secure hybrid-cloud operations.

- Designed networking, capacity, and region architecture (VPC/VNet, load balancing, DNS) for high-value enterprise customers.
- Spearheaded an Azure Chat Support platform launch and subscription-lifecycle automation, improving customer time-to-resolution.
- Diagnosed complex cloud infrastructure issues with product and security teams; tracked delivery through Jira/Confluence Agile workflows.

Operations Lead — Azure Live Site Operations & Platform Reliability

Microsoft Corporation (via Mindtree) | Hyderabad, India | May 2012 - Nov 2016

Led 12 senior + 20 service engineers operating cloud infrastructure across global data centers at 99.95%+ SLA.

- Built PowerShell automation frameworks saving thousands of manual engineering hours annually and reducing operational toil.
- Led platform onboarding/integration for ICM, JIT, and KeyVault (secrets/KMS-class); filed 200+ infrastructure bugs and improvements.
- Performed deep cluster-to-blade investigations, change management, and patch/upgrade rollouts affecting millions of customer workloads with zero incidents.
- Designed telemetry collection and alerting for 100+ cloud services; mentored engineers from specialists to technical leads.

Systems Analyst / Data Center Engineer

IBM (via Infosoft Inc) | Hammond, IN | Sep 2009 - Nov 2011

Infrastructure and data-center engineering across RHEL/Windows environments.

- Performed server builds, decommissions, and cluster configuration; executed large-scale data migrations.
- Deployed patches, hotfixes, and service packs; scripted repetitive infrastructure tasks for consistency and speed.

SELECTED PROJECTS & CASE STUDIES

AI-Driven Incident Automation Platform — Designed and shipped an AI SRE agent integrating telemetry, Logic Apps, and automated remediation workflows — 30-35% of incidents auto-resolved, freeing engineers for higher-value platform work.

Infrastructure-as-Code Delivery Pipelines — Standardized environment provisioning and release pipelines with Terraform and CI/CD, improving deployment consistency, rollback safety, and audit traceability across production services.

Enterprise Cloud Migration & Hybrid Integration — Led zero-downtime migration of enterprise subscriptions and data, integrating on-prem identity and networking for secure hybrid-cloud operations.

Observability & Cost/Reliability Telemetry — Built KQL + Power BI dashboards surfacing SLA, alert health, and operational metrics; eliminated 25,000+ stale incidents and 500+ redundant alerts.

LEADERSHIP & COLLABORATION

- Led and mentored global engineering teams of 15-32 across the US and India, growing individual contributors into technical leads.
- Acted as the central escalation authority and SME for high-severity infrastructure incidents, coordinating Security, Enterprise Architecture, and product teams under pressure.
- Educated clients and internal stakeholders on cloud deployment patterns, IaC standards, and reliability best practices.
- Synthesized incident and reliability data into executive-level reviews driving platform investment decisions.
- Champion of continuous learning and AI adoption — early operationalizer of AI/automation in production support and SRE.

CERTIFICATIONS

- Microsoft Certified IT Professional — Implementing Microsoft Azure Infrastructure Solutions (70-533, 70-534)
- Microsoft AZ-900 — Azure Fundamentals
- Google Cloud Computing Foundations
- Google — Introduction to Generative AI
- TechMahindra AI White Belt
- AWS Solutions Architect / AWS DevOps Engineer — in progress

EDUCATION

- Bachelor of Engineering in Computer Science Engineering, JNTU, Hyderabad (2008)

ENGINEERING PHILOSOPHY

I build platforms that engineers trust: automate the toil, codify the infrastructure, instrument everything, and make the secure path the easy path. Reliability is a feature — delivered through reusable frameworks, disciplined CI/CD, and a culture of continuous learning.
